

DEPARTMENT OF ENVIRONMENTAL HEALTH SCIENCES

WHY Environmental Health

Sciences? Students develop knowledge and technical expertise about the links between health and the environment to implement science-based policies for current and future environmental health challenges. Students and faculty are involved in projects that span bench science, applied research, policy analysis, and community-based local and international projects. Faculty members guide students through every step at UCLA to become leaders in the field. EHS students play an active role on campus and in the local community to advance public health.
