

DEPARTMENT OF EPIDEMIOLOGY

WHY FSPH Epidemiology? The Department of Epidemiology provides a unique education and training program that is focused on applied learning. Students receive a solid foundation in epidemiologic methods and apply their newly acquired knowledge base to real life public health settings working with world-class faculty members. Vast opportunities for training are provided in many different areas ranging from international global health projects to daily health crisis management in local health departments and participation in ongoing longitudinal public health research projects. Our well-rounded epidemiology degree programs include rigorous training in epidemiologic methods and practical application in study design and conduct, data analysis, and communication skills.
